ABSTRACT | |

My name is Naomi. I'm a trans woman and I found myself in the technology world when I was 15. Since then, I always applied to learn more about this universe and aimed to help as much people as possible with my knowledges. I went through web development, user interfaces, and cloud computing; today I stay in touch with these but also include other subareas such as cybersecurity. I look forward to making the cyberspace a better and safer place.

PROJECTS | |

I developed Pet Paws - an open-source application that gathers available pets for adoption in your vicinity, providing users with the facility to do a good deed and contribute to the mistreatment decease.

I also developed Fly Web project, which helps people take their business to the next level with very affordable prices. Some of the services offered include logo design, interface design, and frontend development.

WORK EXPERIENCE | |

ENGLISH INSTRUCTOR

MJ SCHOOL: SET 2020 - DEC 2020

My main role in this company was to plan and teach English classes for beginners. In addition, it was also my responsibility to help organize internal projects and provide support in the IT area, including:

- System Formatting
- Peripheral Maintenance
- File Updating
- Diagnosing and fixing bugs

UX/UI DESIGNER

FLY WEB DESIGNS: JAN 2020 - MAY 2021

My main role in this project was to survey the requirements of new clients, communicate with the development manager and start the user experience research. I was also responsible for the user interface and the making of the logo.

ANALISTA DE HELP DESK

CLIQX: JUN 2021 - ATÉ O MOMENTO

My main functions in this company are focused on composing the level 1 support team, answering the calls, performing small analysis, generating reports and solving certain problems. Besides that, I also develop some scripts intending to automate certain tasks.

"Technology is best when it brings people together."

- Matt Mullenweg, Social Media Entrepreneur
